Installation Details

1. Prep the wall with an appropriate sized hole.

2. Screw the wall plate onto the wall with the appropriate fasteners for the wall material.

3. Terminate cables appropriately. The transformer needs to be accessible for maintenance purposes.

4. Mount the timber body to the wall plate using the attached bracket. Secure the two brackets together using the M3 grub screws. (A suitable hex key is supplied)

5. Test installation meets the requirements of AS/NZS 3000.
